

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Infotainment System 18

Digital Signal Processing (DSP)
The DSP feature is selected through the SOUND menu and provides a choice of two different listening experiences. DSP can be used while listening to the audio system.

The following touch-variable buttons are located at the bottom of the screen:

Source: This setting provides the best overall sound quality for all listening positions.

S1 Surround: The Infotainment system used in combination with the Bose® surround sound system includes digital S1 decoding. This technology uses the full benefit of digital S1 recordings, so digitally recorded music and movie soundtracks will play accurately.

Compaq® Compaq® signal processing creates a Bose® surround sound listening experience from stereo CDs and satellite radio. This feature operates automatically when turned on. There is no need to adjust audio controls.

Radio Settings

To view the DSP options, press the DSP Settings screen button on the Sound Menu.

To access the RADIO settings menu:

- Press the CONFIG hard key, from touch the Radio tab.
- Press the CONFIG hard key until the Radio menu displays.
