

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

**2011 Bmw 335d Owners Manual**

**Controls overview**

**Coolant temperature**  
A warning lamp will come on if the coolant, and therefore the engine, becomes too hot. In addition, a message will appear on the Control Display.  
Check coolant level; refer to page 335.

**Energy Control\***  
Displays the current fuel consumption. This allows you to see whether your current driving style is conducive to fuel economy with minimum exhaust emissions.

**Engine oil temperature\***  
When the engine is at normal operating temperature, the engine oil temperature is normally approx. 210 °F (100 °C) and approx. 300 °F (150 °C).  
If the engine oil temperature is too high, a message appears on the Control Display.

**Fuel gauge**  
Fuel tank capacity approx. 16.1 gallons/ 61 litres.  
You can find information on refuelling on page 332.  
If the fill of the vehicle varies for a longer period, when you are driving in rougher terrain, for example, the indicator may fluctuate slightly.

**Reserve**  
Once the fuel level has fallen to the reserve zone, a message briefly appears on the Control Display and the cruising range for the remaining amount of fuel is displayed on the computer. Under a cruising range of approx. 30 miles (50 km), the message remains on the Control Display.

**\* Refuel as soon as possible once your tank contains only less than 30 miles/ 50 km; otherwise, engine functions are not ensured and damage can occur. \***
