

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Assistive Technology and Higher Education

This issue of our newsletter is about the use of assistive technology in higher education, and introduces the Higher Education Assistive Technology Lending Program, or HEAT.

BENEFITS OF ASSISTIVE TECHNOLOGY IN POSTSECONDARY EDUCATION

Subject: Scott, Susan, Deborah, et al. | Topic: Assistive Technology Lending Program

For thousands of college students with disabilities across America, the college and availability of assistive technology is just as vital to their academic success as registering for classes and paying tuition.

An absolute necessity for some students and a subtle enhancement for others, assistive technology gives an integral role for many in successfully completing postsecondary education.

Students with all types of disabilities depend on assistive technology as a means to access course documents, finish projects, and complete assignments.

"Using Flash to specify software really was a lifesaver for me this past semester," said one Temple University student, a film major now studying film in film. "It helped me hear a better grade of the text and scored higher on my in-class lecture of it."

Assistive technology (AT) is essential to postsecondary institutions throughout the country—it connects a student's

existing abilities to an educational opportunity that may not be accessible due to a disability.

"Technology can provide important tools for meeting the performance of state quality and career," said Wisconsin Matt, an employee of the National Information Center for Children and Youth with Disabilities.

"But for some individuals with disabilities, assistive technology is a necessity that values their strengths in or particular needs. In addition to or particular needs, the service providers at postsecondary education institutions, the advantages of AT are numerous, so long as users are properly trained and willing to take the time to learn about the technology."

Many countries institutions, including Temple University, have specific pieces of AT when the physical environment is not suitable so the AT can be used privately anywhere on campus. (Introduction page 2)

What is HEAT?

HEAT, or the Higher Education Assistive Technology Lending Program, is an enhancement to Pennsylvania's Assistive Technology Lending Library (ATLL) is funded by a grant from the Pennsylvania Department of Education and enables students in Pennsylvania's post-secondary programs, colleges, universities, vocational training (Introduction page 2)
