

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

High Air Temperature

35°C (95°F) or above

1. Do not use the choke.
2. With the throttle slightly open, push the starter button.
3. Warm up the engine by opening and closing the throttle slightly.
4. If idling is unstable, open the throttle slightly.

Fig. 3-10

(1) Starter button

Low Air Temperature

10°C (50°F) or below

1. Follow step 1 - 2 under "Normal Air Temperature."
2. Warm up the engine by opening and closing the throttle slightly.
3. After the engine has warmed up, move the choke lever right to the fully OFF (C).
4. If idling is unstable, open the throttle slightly.

CAUTION:

- Extended use of the choke may impair piston and cylinder wall lubrication and shorten the life of the engine.
- Do not race the engine during the warm-up period.
- Racing a cold engine wastes fuel and increases engine wear.
