Introduction		Contents	
The service manual describes the service procedures for the ST1100. The Model Specific Manual includes every service procedure that is of a specific nature to this particular model. Basic service procedures that are common to other Honda Motorcycles/Motor Scooters/ATVs are covered in the Common Service Manual. The Model Specific Service Manual should be read together with the Common Service Manual in order to provide complete service information on all aspects of the motorcycle. Throughout the manual, the following abbreviations are used to identify individual models: COOSE AND TYPE A All states AD California CAI Canada Follow the Maintenance Schedule (Section 3) recommendations to ensure that the vehicle is in peak operating condition and the emission levels are within the standards set by the U.S. Environmental Protection Agency and the California Air Resources Board. Performing the first scheduled maintenance is very important. It helps prepare for the initial wear that occurs during the break-in period. Section 3 and 3 apply to the whole motorcycle. Section 2 illustrates procedures for removal/installation of components that may be required to perform service described in the following sections. Section 4 through 23 describe parts of the motorcycle, grouped according to locations. Find the section you want on this page, then turn to the table of contents on the first page of the section. Most sections describe the service procedure through event illustrations. Refer to the next page for details on how to use this manual. If you are not familiar with the motorcycle, read Technical Features in section 23. If you don't know the source of the trouble, go to section 24 Troubleshooting. All information, specifications, directions and illustrations included in this publication are based on the latest product information available at the time of printing. HONDA MOTOR CO., LTD. reserves the right to make changes at any time without notice and without incurring any obligation whatsoever. No part of this publication may be reproduced without written permission. This manual is written for persons who have acquired basic knowledge of maintenance on Honda motorcycles.
