

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

2. Adjust idle speed by turning the throttle stop screw (Fig. 4-9).  
Idle Speed: 1,400  $\pm$  100 rpm.

To adjust the air-fuel mixture:

1. Turn the air screw (2) clockwise until you hear the engine miss or decrease in speed.
2. Then turn the screw counterclockwise until the engine misses or decreases in speed again.
3. Center the air screw exactly between the two extreme positions. Usually, the correct setting (between extremes of rich and lean) will be found at 1-1/2 turns open from a fully closed position.
4. If idle speed changes after adjusting the fuel mixture, readjust the throttle stop screw.
