#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Honeywell
HONEYWELL COOL MIST HUMIDIFIER
Up to 95.0% Germ Free*
2.6L gallons (2.6 liters) output per day
MODEL HCM-350 SERIES AND HCM-350B-C31

IMPORTANT SAFETY INSTRUCTIONS
READ AND SAVE THESE SAFETY INSTRUCTIONS BEFORE USING THIS HUMIDIFIER

When using electrical appliances, basic precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons, including the following:

1. Always place the humidifier on a firm, flat and level surface. This humidifier may not be used on carpet or an uneven surface.
2. Place this humidifier on a surface that is not accessible to children.
3. Do not place the humidifier near any heat sources such as stoves, radiators, and heaters.
4. Do not use the humidifier outdoors.
5. Before using the humidifier, check the power cord for any signs of damage. If the cord is found to be damaged, DO NOT USE and return the humidifier to the manufacturer under the warranty agreement for repair.
6. This appliance has a polarized plug (one blade is wider than the other). To reduce the risk of electric shock, this plug is intended to fit only one way in a polarized outlet. If the plug does not fit correctly in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. DO NOT attempt to correct this safety feature.
7. To disconnect the humidifier, first turn controls to the OFF position, then pull the plug straight out from the wall outlet. Never pull on the cord.

8. A leak of water from the AC outlet (evaporator) indicates that water is overflowing and a replacement of the plug. Contact a qualified technician to replace the AC outlet.

9. The humidifier should always be unplugged and disconnected from the wall outlet or main power source when not in use.

10. Never use oil or other liquids in the humidifier unless it is specifically designed for that use. NEVER use the humidifier with any liquid other than water.

11. The humidifier requires regular cleaning. Refer to the USER MANUAL for cleaning instructions. Never clean the humidifier in any liquid other than as instructed in the manual.

12. Do not drink moisture from the water if indicated, used or heated.

13. Always use the humidifier in a well-ventilated room or small rooms. Check periodically for proper ventilation. Do not use the humidifier in a room with a high humidity level.

14. Turn the humidifier OFF if you notice moisture on the walls of your bedroom. The proper humidity level is 30-50% relative humidity. It is available in many languages and departments stores, or by contacting our Sales Department.

***The humidifier contains a small amount of moisture. Degree of Germ Free is based on laboratory testing under laboratory conditions only. If the plug does not fit, do not attempt to correct with your bare hands.**
