#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

GETTING STARTED WITH YOUR ST9400A

Your ST9400A should have been set up to work correctly when it was installed. However, the following will show you how you can modify your settings to meet your particular lifestyle.

To assist you with programming and everyday use your ST9400A will display text messages at every stage to help you get the most out of your central heating and hot water system. The ST9400A uses LoT™ Technology to constantly update the display to give you feedback about what is required.

Step 1: Setting the Date & Time

Your ST9400A had the date and time set at the factory, and these are normally maintained by a backup battery in the event of power failures. If you wish to change the date or time, or if the LoT™ Display shows the message 'SET DATE + TIME' just follow the instructions below. Otherwise, go to **Step 2**.

a. Move the slider to the **DAY/TIME** position. The message 'SET DATE + TIME' will show briefly on the screen, followed by 'SET THE DAY', and the day of the month will now be flashing to indicate it can be changed.

b. To change the day of the month, press the **←** or **→** buttons until the correct day is shown. Each press of the button will change the date by one day. As soon as a change has been made, the message 'IS DAY OK?' will be displayed. Once the correct day is reached, press the green **OK** button to confirm, and move to the next step. If you do not need to make a change, just press the **OK** button immediately and this will move you to the next step.

c. The month digits will now be flashing and 'SET THE MONTH' will be displayed. To change the month, press the **←** or **→** buttons until the correct month is shown. The message 'IS MONTH OK?' will be displayed. Press the green **OK** button to confirm the month is correct, and move to the next step.
