

## #Jenny

Finally I get this ebook, thanks for all these I can get now!

## #Rio

Cool! I'am really happy

## #Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

## #Hun Tsu

wtf this great ebook for free?!

## #Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

## #Diego Butler

so many fake sites. this is the first one which worked! Many thanks

## Installation

**CAUTION** Before operating your new appliance please read this instruction booklet carefully. It contains important information concerning the safe operation, installation and maintenance of the appliance.

Please keep these operating instructions for future reference. Pass them on to any new owners of the appliance.

### Positioning

Keep all packaging material out of the reach of children. It may present a choking or suffocation hazard (see Precautions and Tips).

The appliance must be installed by a qualified professional in accordance with the instructions provided. Incorrect installation may cause harm to people and animals or may damage property.

### Built-in appliance

Use a suitable cabinet to ensure that the appliance functions properly.

- The supporting surface must be heat-resistant up to a temperature of approximately 100°C.
- If the appliance is to be installed above an oven, the oven must be equipped with a forced ventilation cooling system.

Avoid installing the hob above a dishwasher: if this cannot be avoided, place a waterproof separation device between the two appliances.

- Depending on the hob you want to install, the cabinet must have the following dimensions (see figure).

### Ventilation

To ensure adequate ventilation and to avoid overheating of the surrounding surfaces the hob should be positioned as follows:

- At a minimum distance of 40 mm from the back panel.
- So that a minimum distance of 20 mm is maintained between the installation cavity and the cabinet underneath.

Kitchen cabinets adjacent to the appliance and side flaps up to 60 mm must be at least 800 mm from the edge of the hob.
