FRIDGE FREEZER - MODELS RFA80, RFA70, RFA60, RFS60  
INSTRUCTIONS FOR INSTALLATION & USE

**GETTING STARTED:** To ensure that your fridge freezer runs reliably and efficiently follow these steps.

<b>STEP 1</b> Choose a location for your fridge freezer away from any heat sources and allow adequate ventilation - 100mm (4 inch) gap above.	<b>STEP 2</b> Move the fridge freezer into position, using the sides of the cabinet. Take care to avoid damaging the refrigerant circuit pipe work on the rear.
<b>STEP 3</b> Level the fridge freezer by adjusting the front feet. This will stop rocking or vibration and keep the door aligned. <small>NB: The spacer is for illustration only and is not supplied with the fridge freezer.</small>	<b>STEP 4</b> After the front feet have been adjusted and the fridge freezer is level in the left and right hand sections fridge covers supplied with the cover plate slots and push into position.
<b>STEP 5</b> Before plugging in and switching on, leave the fridge freezer in its final location for at least 15 minutes to allow it to settle.	<b>STEP 6</b> Plug in and switch on. Allow the fridge freezer to cool before placing food inside. The high temperature light will stay on until the fridge freezer has cooled down. All food in the fridge freezer should be covered.
<b>STEP 7</b> If you are freezing fresh food turn on fast freeze by pressing the switch 24 hours before placing the food inside. Place the fresh food inside. <small>Remember to turn fast freeze off after 24 hours. However if you forget to do so it will automatically switch off for you.</small>	<b>STEP 8</b> Your fridge freezer is now working. If after 24 hours your fridge freezer is not operating as you want, refer to the troubleshooting section.

Read the rest of these instructions to get the best from your appliance and remember to fill in your guarantee registration.
