## Stick Shift Driving Instructions And Tips On Driving A Stick Shift

Learning to drive a manual transmission is something that is quite simple with the proper tips on driving a stick shift. Driving a stick shift is not only more exciting than driving an automatic transmission but there are also several advantages. In addition to having more control of your vehicle, driving a manual transmission vehicle is also cheaper. The only drawback to learning to drive a manual transmission is the intimidation factor that many people face when thinking of learning to drive a stick shift

## Instructions And Tips For Learning To Drive A Manual Transmission

The first thing you will notice when learning to drive a stick shift is that there are 3 pedals instead of 2. These 3 pedals are from left to right the clutch, the brake, and the gas pedal.

The other big difference with a manual transmission vehicle is the gear shift. An automatic transmission vehicle shifts for you automatically, but with a stick shift car, you are responsible for shifting the gears. Most stick shift cars are 5 speed, but there are some older 4 gear vehicles as well as newer 6 gear sports cars.

One important thing you must learn before you start to learn how to drive a stick shift is the use of the parking brake. You must either leave the car in gear when not in use and you must always engage the parking brake or your vehicle will roll, especially if you are parked on a hill.
