#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Manual of Standards and Specifications for Railway Stations

FOREWORD

In our endeavour to provide the best possible infrastructure for convenience and comfort of our passengers and other stakeholders, Indian railways have been improving the Railways Stations on a continuous basis. Towards this pursuit of excellence, L&A directorate has brought out this Manual of Standards and Specification for Railway Stations to be used for development of station into world class station through Public Private Partnership.

The first of its kind, this manual has laid down set of guidelines, standards and specifications for the construction of new Railway Stations or Redevelopment of the existing Stations to bring them up to the International Standards in terms of efficiency of operations and providing the comfort and convenience to our passengers and the stakeholders.

A number of stations of IR, located at metropolitan cities and important centers are identified for development through PPP route by leveraging a part of the real-estate development potential. Honble Minister for Railways has already taken up an ambitious program of Redeveloping 26 station into world class station so far requiring huge investments. Most of these investments are expected to be realised through partnership with the private sector. Ensuring participation of the private sector in infrastructure development in a transparent manner requires specific framework. It requires a greater clarity on scope of work along with Expected performance parameters other than manageable level of risk and adequate service quality assurance at an affordable cost. This manual, I hope will serve this purpose by laying down the minimum standards that the MCR and the concessionaire will observe and expect on the matter of construction and management of these stations

I hope that this manual will be of interest to all those who are interested in redeveloping the station, either new or existing through PPP route into world class station. I wish all success to them in their endeavour to achieve a world class facility at Railway Stations.

June, 2009

Chairman, Railway Board
