so many fake sites. this is the first one which worked! Many thanks

Ques 1. What is Integration Testing ?

- Ans 1. Integration testing is the phase of software testing in which individual software modules are combined and tested as a group. Integration testing is black box testing, the purpose of this testing is to ensure different component of the application still work in accordance to the customer requirement. Test cases are developed with the purpose of exercising the interfaces between the components. This activity is carried by the test team.
