#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Application Engineer - Additive Manufacturing

Arcam Cad to Metal Inc. is seeking a highly skilled Engineer who wants to work with the advanced 3D printers for metal in an exciting and challenging environment. The position is located at our recently opened office in Woburn, MA.

Job Description:

The Application Engineer will work closely with our customers, helping them to implement the use of 3D printing with EBM in their production – from idea to product. You will support and develop our biggest customers, mainly within Aerospace and Orthopaedic industries.

Core Responsibilities:

- Use product/service and application knowledge to address customer requests in a manner that enhances Arcam's reputation as a solution provider. You will manage material related technical issues, hold training courses on the EBM process and provide technical support for new sales.
- Effectively communicate ideas, capabilities and data with customers.
- Provide application and product development support for new and existing projects.
- Interact with marketing, manufacturing, sales and customers to promote and enhance Arcam's service offerings.

Qualifications:

- MSc or equivalent, preferably with knowledge in the production of metal parts.
- Good ability to understand complex technical concepts and develop innovative
