#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

SECTION 204-02 Front Disc Brake  
REMOVAL AND INSTALLATION

2007 Escape Workshop Manual  
Procedure revision date 04/04/2007

## Brake Pads

### Removal

**WARNING:** Asbestos fiber dust may be present on brake and clutch assemblies and is hazardous to health if inhaled.

Brake and clutch assemblies should be cleaned using a vacuum cleaner recommended for use with asbestos fibers such as a brake/clutch service vacuum. The bag must be labeled per OSHA instructions, sealed, and the trash handler notified as to the bag's contents.

If a vacuum suitable for asbestos is not available, cleaning should be done wet. If dust generation is still possible, technicians should wear government-approved toxic dust purifying respirators. Failure to follow these instructions may result in personal injury.

1. Remove the wheel and tire assembly. For additional information, refer to [Section 204-04](#).
2. Remove the brake caliper clip.

3. Position the caliper aside.
  1. Remove brake caliper bolt caps and the bolts.
  2. Position the caliper aside and support.

4. Remove the brake pads.
  - Remove the outer brake pad from the anchor.
  - Remove the inner brake pad from the caliper piston.
