

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Using Roxio Easy CD Creator 5

It is very important to back up your data on a regular basis, especially data stored on your hard drive. Backing up your data to CD is a very easy and cost effective method. Most compact computers are equipped with a CD burner and have the Roxio Easy CD Creator 5 software pre-installed. This document contains instructions for backing up your data to CD using Roxio. If you do not have Roxio installed on your computer or need assistance, please contact the Help Desk at 832-4720.

To Burn a CD with Roxio Easy CD Creator 5:

1. Click on Start, then All Programs.
2. Click on Helper Apps and Utilities.
3. Click on Roxio Easy CD Creator 5.
4. Click on Applications, then Easy CD Creator.
5. Easy CD Creator will open to a new Unlabeled Data CD Project (as in the screenshot below) and you will see a Source window and a Data CD Project window. The Unlabeled Data CD Project window is divided into two parts: the top part is the Source window and the bottom part is the Data CD Project window.
6. Insert a blank CD-R into the CD burner drive on your computer. Blank CD-R discs can be purchased from any office supply store or ordered through CCSU's office supply vendor. Make sure the CD-R you are using is brand name (name) and you have been a user to load the bottom side of the CD in the appropriate way (name). Check the disc carefully. Use the quality, clear, unscratched disc. The only disc that is not a good idea is a name (name).
7. Once the CD burner drive has detected the blank CD-R disc, a generic CD name (usually a group of numbers) will appear next to the CD icon in the Data CD Project window. You may rename the CD to anything you would like, simply right-click the generic name, click on Rename, then type the new name and hit Enter (write: the name will appear on the bottom side of the disc when you burn the CD-R to any computer).
