#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Converting Video for your iPad or iPhone

Roxio Toast 11 takes converting video for devices such as iPad, iPhone, Apple TV, Android, and many other platforms to a new level. Some great new features include custom export profiles and Video Boost. To learn more, take a look at the steps below.

Getting Started:

1. **Choose a project type.** In the Convert tab of the main window, choose **Video Files** in the drop-down menu located above the Content Area. Aside from converting video files, Toast can also convert VIDEO, TV Series and unencrypted DVDs for handheld devices.

2. **Add files to your project.** The quickest way to add video files to your project is by means of the Media Browser. In the Video tab, you can import video files from iMovie, your Movies folder, unencrypted DVDs, EyeTV, TiVo, and iHD cameras, and Flash-based web sources. Once you find the right file, just drag and drop it to the Content Area. Note that you can also drag and drop files from the Finder.
