

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

(v) First, we will find the product $11.1 \times 1.1 \times 0.11$.

$$\begin{aligned} \text{Now, } 111 \times 11 \times 11 &= 1221 \times 11 \\ &= 13431 \end{aligned}$$

$$\begin{array}{r} 1221 \\ \times 11 \\ \hline 1221 \\ 1221 \times \\ \hline 13431 \end{array}$$

Sum of decimal places in the given numbers = $(1 + 1 + 2) = 4$
So, the product must have four decimal places.

$$\therefore 11.1 \times 1.1 \times 0.11 = 1.3431$$

(vi) First, we will find the product $2.1 \times 0.21 \times 0.021$.

$$\begin{aligned} \text{Now, } 21 \times 21 \times 21 &= 441 \times 21 \\ &= 9261 \end{aligned}$$

$$\begin{array}{r} 441 \\ \times 21 \\ \hline 441 \\ 882 \times \\ \hline 9261 \end{array}$$

Sum of decimal places in the given numbers = $(1 + 2 + 3) = 6$
So, the product must have six decimal places.

$$\therefore 2.1 \times 0.21 \times 0.021 = 0.009261$$
