

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Sol. $x^2 + 3x - 10$

$$\text{Let } f(x) = x^2 + 3x - 10$$

$$= x^2 + 5x - 2x - 10$$

$$\left\{ \begin{array}{l} \because -10 = 5 \times (-2) \\ 3 = 5 - 2 \end{array} \right\}$$

$$= x(x + 5) - 2(x + 5)$$

$$= (x + 5)(x - 2)$$

Let $f(x) = 0$, then

$$(x + 5)(x - 2) = 0$$

Either $x + 5 = 0$, then $x = -5$

or $x - 2 = 0$, then $x = 2$

\therefore Zeros are $-5, 2$

$$\text{Now, sum of zeros} = -5 + 2 = -3 = \frac{-b}{a}$$

$(\because a = 1)$

$$\text{Product of zeros} = -5 \times 2 = -10 = \frac{c}{a}$$
