Siemens As140 Manual

Safety precautions

- Read this manual and the safety precautions carefully before use. Explain their contents to your children, and the potential hazards associated with using the telephone.
- Only use the mains unit supplied.
- Use only the approved rechargeable battery pack. Never use a commercial coin-rechargeable battery pack as this could damage your health and cause injury. Use the battery pack as directed in these instructions (page 7).
- The operation of medical appliances may be affected. Be aware of the technical conditions (frequency and electric environment) in your practice.
- The handset may cause an 'intoxicating' effect in hearing aids. Do not hold the handset against your ear while it is ringing (incoming calls).
- Do not install the phone in a bathroom or shower room as the handset and base are not splash-proof (page 7).
- Do not use the telephone in environments subject to explosion hazard (e.g. auto paint shops).
- If you give your Gigaset to someone else, make sure you also give them the operating manual.
- Dispose of the battery pack and telephone in accordance with environmental regulations.
- Do not pollute the environment. Emergency numbers cannot be dialled if the keypad lock, page 10, is activated. Not all of the functions described in this manual are available in all countries.
