#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Simple Solutions 4th Grade Lesson 130

4th Grade Common Core Lesson Plan: Using the four operations to solve word problems.

Standard:
4.MD.2. Use the four operations to solve word problems involving distances, intervals of time, liquid volumes, masses of objects, and money, including problems involving simple fractions or decimals, and problems that require expressing measurements given in a larger unit in terms of a smaller unit. Represent measurement quantities using diagrams such as number line diagrams that feature a measurement scale.
<http://www.illustrativemathematics.org/HSIndex/4/4/2/2>

Objectives:
• Students will use the four operations to solve word problems.
• Students will solve word problems involving distances, intervals of time, volume, mass, and money.

Materials:
SMART board
(If a SMART board is not available, teachers can print a pdf of the slides to put on an overhead.)

Simple Solutions Worksheet

Prior CCSS:
Teachers may need to review prior CCSS before beginning this lesson. These standards emphasize word problems.
1. 3.OA.2. Telling and writing time to nearest minutes, and measure time intervals in minutes.
2. 3.OA.8. Solve two-step word problems using the four operations.
3. 3.MD.1. Use four operations to solve one-step word problems using money or objects that are given in the same units.

Procedure:
1. The SMART board slides allow students to practice word problems that 4.MD.2 address. Using the SMART board slides along with the worksheet will provide students practice with each type of problem.
2. Depending on student understanding, teacher may want to use the first problem to demonstrate how to solve a real-world problem, then have students complete the second problem on their own.

Assessment:
Observation during the SMART board presentation.
Completion of the worksheet.
Score on the worksheet.
