#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Simple Solutions CC Math 5  
Title: Website  
Name: \_\_\_\_\_ Class: \_\_\_\_\_

1. The chart shows the distance between stations on a nature lake. Make a line plot to show the data set. What is the total distance of the lake from start to point H?	<table border="1"><thead><tr><th>Station</th><th>Point</th><th>Distance</th><th>Frequency</th></tr></thead><tbody><tr><td>A</td><td>E</td><td>1</td><td>1</td></tr><tr><td>B</td><td>F</td><td>2</td><td>2</td></tr><tr><td>C</td><td>G</td><td>3</td><td>3</td></tr><tr><td>D</td><td>H</td><td>4</td><td>4</td></tr></tbody></table>	Station	Point	Distance	Frequency	A	E	1	1	B	F	2	2	C	G	3	3	D	H	4	4
Station	Point	Distance	Frequency																		
A	E	1	1																		
B	F	2	2																		
C	G	3	3																		
D	H	4	4																		
2. Use the data in the chart to make a line plot for the weights of 8 packs of modeling clay. If the clay were divided equally among 8 students, how much would each student get?	<table border="1"><thead><tr><th>Weight (lb)</th><th>Frequency</th></tr></thead><tbody><tr><td>0.5</td><td>1</td></tr><tr><td>1.0</td><td>2</td></tr><tr><td>1.5</td><td>3</td></tr><tr><td>2.0</td><td>2</td></tr></tbody></table>	Weight (lb)	Frequency	0.5	1	1.0	2	1.5	3	2.0	2										
Weight (lb)	Frequency																				
0.5	1																				
1.0	2																				
1.5	3																				
2.0	2																				
3. The graphic shows the amount of saltwater in 10 different one-gallon containers. Create a line plot to show the data set. If the liquid were distributed equally in the containers, how much would be in each?	<table border="1"><thead><tr><th>Amount of saltwater (gallons)</th><th>Frequency</th></tr></thead><tbody><tr><td>0.2</td><td>1</td></tr><tr><td>0.4</td><td>2</td></tr><tr><td>0.6</td><td>3</td></tr><tr><td>0.8</td><td>2</td></tr><tr><td>1.0</td><td>2</td></tr></tbody></table>	Amount of saltwater (gallons)	Frequency	0.2	1	0.4	2	0.6	3	0.8	2	1.0	2								
Amount of saltwater (gallons)	Frequency																				
0.2	1																				
0.4	2																				
0.6	3																				
0.8	2																				
1.0	2																				
4. The chart shows the weights of 6 packages of straws. Make a line plot to show the data set. If the straws were divided equally to make 12 smoothies, how much would go into each smoothie?	<table border="1"><thead><tr><th>Weight of strawboxes (lb)</th><th>Frequency</th></tr></thead><tbody><tr><td>1</td><td>1</td></tr><tr><td>2</td><td>2</td></tr><tr><td>3</td><td>3</td></tr></tbody></table>	Weight of strawboxes (lb)	Frequency	1	1	2	2	3	3												
Weight of strawboxes (lb)	Frequency																				
1	1																				
2	2																				
3	3																				
5. Name the ordered pair that represents the heart on the coordinate plane.																					
6. Name the ordered pair that represents the star on the coordinate plane.
