#Jenny

*Finally I get this ebook, thanks for all these I can get now!*

#Rio

*Cool! I'am really happy*

#Markus Jensen

*I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook*

#Hun Tsu

*wtf this great ebook for free?!*

#Che Salsa

*My friends are so mad that they do not know how I have all the high quality ebook which they do not!*

#Diego Butler

*so many fake sites. this is the first one which worked! Many thanks*

## User Manual

### CHAPTER 1 Technical Specification

This chapter describes the CX-Programmer software in general terms and provides details of the operating environment and minimum configuration necessary for the satisfactory operation of CX-Programmer.

#### CX-Programmer Software

CX-Programmer is a PLC programming tool for the creation, testing and maintenance of programs associated with Omron Cx2-series PLCs, Cx-series PLCs and C-series PLCs. It provides facilities for the support of PLC device and address information and for communications with OMRON PLCs and their supported network types.

CX-Programmer operates on IBM compatible personal computers with Pentium or better central processors, including Pentium II. It runs in a Microsoft Windows environment (Microsoft Windows 95, 98, Millennium, 2000 or XP and NT4.0 with Service Pack 5 or later).

#### About this Manual

This User Manual acts as a reference for CX-Programmer by describing its various concepts and abilities, and by leading the user through the basics of CX-Programmer programming. It also provides a detailed reference for all of the CX-Programmer functions.

Separate OMRON manuals describe the PLC programming structure and instruction set in detail. A separate OMRON manual describes the common features to PLC programming used by software other than CX-Programmer.

**H** CX-Programmer comes with a context sensitive on-line help system which is designed to complement this manual and to provide a quick reference at any point while using CX-Programmer where the manual is not to hand. This general help system uses a fast 'hierarchy system' which allows progressively more information about any topic to be obtained by selecting key words within the descriptive text.

Throughout this manual it is assumed that the reader has a working knowledge of Microsoft Windows, and knows how to:

- Use the keyboard and mouse.
- Select options from Microsoft Windows menus.
- Operate dialog boxes.
- Locate, open and save data files.
- Edit, cut and paste text.
