Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

appearance). For example, a pre-defined style might have an edge type of (thin edges, a face type of hidden line mode, a background color of white, a sky color of blue, a ground color of brown, and so on.

Sketchy Edges

SketchUp allows you to apply various edge types, including hand-drawn sketchy edges, to your model. Sketchy edges are edges that can be unique from any other edge style in SketchUp because unlike other pre-defined edge types, you can create your own sketchy edge using a drawing program like Photoshop. Sketchy edges are simply a collection of different hand-drawn strokes that, when combined and applied to model, give the a model a unique hand-drawn appearance.

Watermarks

Watermarks are images placed in the background or foreground of the drawing area and span the entire area just as sky and ground. Watermarks are great for creating backgrounds, such as simulating paper textures beneath a model. Watermarks can also be used to place logos and other graphics directly on the screen.

Shadows

SketchUp allows you to cast shadows on your model as though the model were in a real-world environment. These shadows can be cast based on time of day and virtual location of the model in the real-world. For example, you can set shadows to see exactly what a model of a house would look like at 10:00 am, December 10, in Boulder, Colorado, which is the default location. Finally, SketchUp's shadows are designed to provide dynamic feedback as you change geometry and your camera viewpoint. The shadow casting feature in SketchUp is a great way to give your models a better sense of depth and realism.
