#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

PHP interview questions and answers for freshers

Welcome !!! In this section we are providing you some frequently asked **PHP Interview Questions** which will help you to win interview session easily. Candidates must read this section then by heart the questions and answers. Also, review sample answers and advice on how to answer these typical interview questions. PHP is an important part of the web-world, and every web developer should have the basic knowledge in PHP. Common **PHP Interview questions**, which should help you become a best PHP coder. We hope you find these questions useful. If you are an interviewer, take the time to read the common interview questions you will most likely be asked.

1. What is PHP?

PHP is a server side scripting language commonly used for web application. PHP has many frameworks and can be used for creating websites. Even a non-technical person can create sites using its CMS, WordPress and Commerce, are the famous CMS of php. It is also an object oriented programming language like java, C-sharp etc. It is very easy for learning.

2. What is the use of "echo" in php?

It is used to print a data in the webpage. Example: <?php echo "Car insurance"; ?>. The following code print the text in the webpage.

3. How to include a file to a php page?

We can include a file using "include()" or "require()" function with file path as its parameter.

4. What's the difference between include and require?

If the file is not found by require(), it will cause a fatal error and halt the execution of the script. If the file is not found by include(), a warning will be issued, but execution will continue.

5. require_once(), require(), include(). What is difference between them?

require() includes and evaluates a specific file, while require_once() does that only if it has not been included before (on the same page). So, require_once() is recommended to use when you want to include a file where you have a lot of functions. For example, This way you make sure you don't include the file more times and you will not get the "function re-declared" error.

6. Differences between GET and POST method ?

We can send 1024 bytes using GET method but POST method can transfer large amount of data and POST is the secure method than GET method.
