

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Errata for Introduction to Electric Circuits, 6th Edition

## Errata for Introduction to Electric Circuits, 6th Edition

Page 18, voltage reference direction should be + on the right in part B:

Page 28, caption for Figure 2.3-1: "current" instead of "current"

Page 41, line 2: "voltage or current" instead of "voltage or circuit"

Page 41, Figure 2.8-1 b: the short circuit is drawn as an open circuit.

Page 42, line 11: "Each dependent source ..." instead of "Each dependent sources..."

Page 164, Table 5.5-1: method 2, part c, one should insert the phrase "Zero all independent sources, then" between the "(c)" and "Connect a 1-A source..." The edited phrase will read:

"Zero all independent sources, then connect a 1-A source from terminal b to terminal a. Determine  $V_{ab}$ . Then  $R_T = V_{ab}/1$ ."

Page 340, Problem P8.3-5: The answer should be  $v_a(t) = 10 - 5e^{-22t}$  V for  $t > 0$ .

Page 340, Problem P8.3-6: The answer should be  $v_a(t) = 5e^{-400t}$  V for  $t > 0$ .

Page 341, Problem P8.4-1: The answer should be  $v(t) = \begin{cases} 5 + 5e^{-2t} \text{ V for } 0 < t < 1.5 \text{ s} \\ 10 - 5e^{-2(30-1.5)t} \text{ V for } 1.5 \text{ s} < t \end{cases}$

Page 546, line 4: The angle is  $\theta_B$  instead of  $\theta_A$ .

Page 554, Problem 12.4-1 Missing parenthesis:  $V_a = (208/\sqrt{3})\angle -30^\circ$

Page 687, Equation 15.5-2: Partial i in exponent:  $e^{i\omega t}$
